Hi everyone: I think that this draft was good. It was easy to work with ☺. I made it shorter, rearranged it, and added headings for history, novel aspects of the assessment and implementation of NRC recommendations.

Ex. 5 Deliberative Process (DP) Hope you like this....and thanks everyone. I know I put a wrench in your process but I think this is going to be good. Hope you agree.

A couple comments. I'd like to hear what others think.

So, I took the note that we had drafted and tried to boil it down to 1-2 paragraphs. Then I went down a rabbit hole with the NRC report and was thinking about all the consternation at the previous meetings and in the public about our lack of framework for WOE for hazard ID. So, the note has grown. I have been working on it all morning and have decided to just stop and let someone else read it. I didn't do a final proof read, sorry.
